

NOF Hatton Award 2010:

Eight scientists participated in this year's NOF-Hatton award competition at the CED-NOF-Israeli IADR meeting in Munich. All had excellent work to present and managed well during the presentation. The jury chose to award a shared first prize to

**G.Tour**, M.Wendel and I.Tcacenku from the Karolinska Institutet

For the study: In vitro generated ECM with hydroxyapatite enhanced calvarial bone repair

And to

**J.C. Wohlfart**, H.J.Ronold, A.M.Aass, L. Heijl and S.P. Lyngstadaas from the University of Oslo for their study: Porous titanium granules in furcation defects- an animal experimental study

The two prize winners get a diploma and a cash prize of 1000 Euros from NOF.

In addition, the two prize winners will participate at the expense of IADR/Unilever in the IADR/Unilever Hatton Award competition taking place at the IADR general session in Barcelona in July 2010.
